

ARTHUR L. – Software Engineer | Fintech & Web3

Nice, FR | 0xa1337@proton.me | <https://arthurs.page> | [GitHub](#) | [LinkedIn](#)

Software engineer building high-stakes financial products across perpetual trading, RFQ, prediction markets, and cross-chain applications. Combines strong trading-domain knowledge and end-to-end feature ownership within distributed teams.

WORK EXPERIENCE

INJECTIVE

Frontend Engineer (Full-time)

(Remote) May 2025 – Current

Frontend engineering across TrueCurrent and Helix, trading platforms supporting over \$15M in daily volume.

- Own TrueCurrent's trade form and core trading logic, including chain-derived leverage constraints, margin and fee calculations, slippage estimations, position sizing, and extensive order validation across 300+ markets
- Optimized RFQ collection to filter executable quotes, and reduce latency
- Built a Polymarket integration for Injective users, delivering an MVP in 3 days and a production release in 2 weeks ahead of the FIFA World Cup
- Established the company's first design system for TrueCurrent, partnering with designers on shared tokens and reusable components while leading alignment across the five-person frontend team
- Built TrueCurrent's portfolio interface, validating financial data against backend calculations

Stack: Nuxt, Vue, TypeScript, Tailwind, Vitest, Viem

IMPERATOR

Full-Stack Engineer (Contractor, Part-time)

(Remote) Oct 2023 – May 2025

Full-stack development for major actors across the Cosmos ecosystem.

- Built cross-chain UI connecting Injective with Solana, used to register, transfer, and bridge domain names
- Developed the official XION blockchain token airdrop checker and claim web app
- Contributed to the official Injective Authz dapp for permission delegation and management

Stack: Next.js, React, Nuxt, Vue, TypeScript, Tailwind, tRPC, Prisma, PostgreSQL, Vitest, Cosmos SDK

DAYLIGHT

Backend Engineer (Contractor, Part-time)

(Remote) Feb 2024 – Invalid date

Backend engineering on the recommendation engine powering wallet experiences across MetaMask, Coinbase Wallet, OKX, and Zerion.

- Built and tested data collectors that normalized onchain and third-party API data into personalized, actionable wallet recommendations

Stack: TypeScript, Node.js, Vitest, PostgreSQL, Prisma, EVM, Viem

AVAILABS

Backend Engineer (Contractor, Full-time)

(Remote) Sep 2023 – Sep 2024

Backend engineering and technical coordination across AI and Web3 products.

- Architected backend services for an AI-powered meal recommendation app and an investor onboarding and token vesting platform
- Coordinated delivery across a team of five developers

Stack: TypeScript, Node.js, Express, NestJS, Vitest, PostgreSQL, Prisma, Stripe

ALCATEL-LUCENT ENTERPRISE

Backend Developer (Apprenticeship)

(Strasbourg, France) Sep 2021 – Sep 2023

Two-year software engineering apprenticeship completed alongside a master's degree.

- Built an office-booking microservice and APIs for product-license sales KPIs

Stack: Node.js, Express, MongoDB

SKILLS

Frontend: Vue, Nuxt, React, Next.js, TypeScript, Tailwind CSS

Backend: Express, NestJS, PostgreSQL, Prisma, MongoDB, REST APIs

Blockchain: EVM Blockchains, Cosmos SDK, Viem/Wagmi, RainbowKit, OnchainKit

DevOps & Tools: GitHub Actions, CI/CD, AWS, Vitest

EDUCATION

UNIVERSITY OF STRASBOURG

Sep 2021 – Jul 2023

Master's Degree, Software Science and Engineering (SIL)

UNIVERSITY OF STRASBOURG

Sep 2018 – Jul 2021

Bachelor's Degree, Computer Science

LANGUAGES

French (Native) | **English** (Proficient)
